# Sony Cyber Security Workshop

by Sony  
Free

Sony will run a workshop at Bilkent University for 3rd-4th year undergraduate students who are interested in cyber security career opportunities. The following topics will be covered during the workshop:

- Software Testing Methodologies
- Linux Hardening
- Web Application Security
- Social Engineering
- Cryptography
- Wireshark Poweruser Workshop

During the event, the participants will also have a chance to apply for a long-term internship at Sony Istanbul office. All computer science & engineering students from all universities are invited. Bringing your own laptop is recommended.
